RS315N Black Terminal Cover

Accessory | MATERIAL | PB.50046

This durable black cover ensures robust protection for battery terminals, preventing short circuits and corrosion for enhanced system reliability. Specifically engineered for automotive, marine, caravan, and camper applications, it offers tailored protection in mobile environments.

Features

- Ensures robust protection for battery terminals, preventing short circuits and corrosion for enhanced system reliability.
- Specifically engineered for automotive, marine, caravan, and camper applications, offering tailored protection in mobile environments.
- Durable black construction provides long-lasting defense against environmental factors and physical damage.
- Designed for straightforward installation, quickly safeguarding connections without complex procedures.
