COTEK CR-8 Remote Control for SD/SP/SC/SL Series

Accessory | COTEK | CR-8

Gain seamless remote operational control of COTEK SD, SP, SC, and SL series power systems, allowing adjustments and monitoring from a distance. This accessory enhances workflow flexibility by eliminating the need for direct access to the main power unit.

Features

- Seamless remote management of COTEK SD, SP, SC, and SL series power systems for enhanced operational flexibility.
- Designed for solar applications, providing convenient control and monitoring from a distance.
- Improves workflow by allowing adjustments and monitoring without direct access to the main unit.
- Ensures user-friendly interaction and reliable performance in various energy management setups.
