

## CTEK 56-384 Battery Clamp

Battery Charger / Acculader | CTEK | CTEK.56-384

When specifying battery clamps, integrated LED indicators provide instant charging status visualization, reducing manual oversight. This robust clamp design ensures a secure connection, guaranteeing efficient charging across CTEK XS08 to MXS70 charger models.

### Features

- Integrated LED indicator for instant charging status visualization, reducing the need for direct charger monitoring.
- Designed for seamless integration with CTEK XS08, MXS38, MXS50, MXS70, and MXS10 charger models for guaranteed compatibility.
- Robust clamp design ensures a secure and stable connection, preventing power interruptions and ensuring efficient battery charging.
- Built for demanding environments, offering reliable performance in automotive, marine, and recreational vehicle applications.

## Technical Specifications

### Regulatory Compliance

Standards: EN 60335-2-29, EN 55014, EN 61000-3-2  
Regulatory: CE

### Product Identification

Item Code: **CTEK.56-384**
