

IEB 48V 100A Industrial Charger

Battery Charger / Acculader | IEB | D400G48-100.B1

Industrial logistics and warehousing demand rapid battery recharge for continuous operation; the 100A charging current of this IEB charger minimises downtime for 48V battery banks. Its industrial-grade construction withstands rigorous continuous use, ensuring operational continuity in demanding environments.

Features

- With a powerful 100A charging current, the IEB charger minimizes downtime by rapidly replenishing 48V battery banks, keeping your industrial operations running efficiently.
- Specifically engineered for industrial settings, this charger is built to withstand the rigors of continuous operation in logistics, manufacturing, and warehousing environments.
- Utilizing advanced charging technology, the IEB D400G48-100.B1 ensures optimal battery performance and longevity through intelligent charge management.
- Designed for robust 48V systems, this charger offers reliable power delivery for electric industrial vehicles and machinery, ensuring operational continuity.

Technical Specifications

Regulatory Compliance

Standards: EN 60335-2-29, EN 55014, EN 61000-3-2
Regulatory: CE
