

## IEB 24V 12A Industrial Charger

Battery Charger / Acculader | IEB | E230G24-12.B65-FP

This charger keeps 24V lead-acid batteries ready with a consistent 12A current for efficient replenishment and maximum equipment uptime. Its IP21 rating protects against dripping water, ensuring reliable operation in demanding indoor industrial environments.

### Features

- Delivers a consistent 12A charging current to efficiently replenish 24V lead-acid batteries, ensuring maximum operational uptime for your industrial equipment.
- Engineered for indoor industrial applications with an IP21 rating, providing essential protection against dripping water and ensuring reliable operation in demanding environments.
- Specifically designed for 24V lead-acid (PB) battery systems, offering optimized charging profiles to prolong battery life and maintain peak performance.
- Robust construction ensures durability and reliability in typical industrial settings, minimizing the risk of operational disruptions.

## Technical Specifications

### Regulatory Compliance

Standards: EN 60335-2-29, EN 55014, EN 61000-3-2  
Regulatory: CE

### Product Identification

Item Code: **E230G24-12.B65-FP**
