

FOREX 24V Load Tester

Battery Tester / Accutester | FOREX | F24-100

Without accurate 24V system load testing up to 100A, unexpected battery failures and costly downtime are likely — this tester delivers precise diagnostics to prevent such issues. USB data logging enables detailed record-keeping, crucial for professional automotive workshops and fleet maintenance.

Features

- Accurate 24V system load testing up to 100A ensures reliable battery health assessment, preventing unexpected failures and costly downtime.
- Designed for automotive workshops, industrial maintenance facilities, and fleet management operations requiring precise battery diagnostics.
- USB data logging capabilities enable detailed record-keeping and reporting for professional service documentation.
- Supports lead-acid (Pb) battery types, providing versatile testing for common vehicle and industrial power applications.

Technical Specifications

Test Capabilities		Battery Type Support	
Battery Testing	? Yes	Flooded Lead-Acid	? Yes
Voltage Support		AGM	? Yes
12V Support	? Yes	GEL	? Yes
		EFB	? Yes

Regulatory Compliance

CE Standards: EN 61010-1, EN 61326-1
Regulatory: CE

Product Identification

Item Code: **F24-100**
Model: **F24-100**
