

TROJAN 24V HydroLink Battery Watering System

Accessory | TROJAN | HYDRO-HL-U24V-1

When specifying a traction battery, an integrated watering system reduces maintenance costs and ensures optimal electrolyte levels. This design directly extends battery life in demanding machines such as cleaning machines, aerial work platforms, and AGVs.

Features

- Sustained 24V power output ensures continuous operation for high-demand machinery.
- Engineered for rigorous use in applications such as cleaning machines, aerial work platforms, golf cars, marine, and AGVs.
- Features a refill system designed to prolong battery life and maintain optimal performance.
- Designed for integration into existing 6V and 12V battery configurations, offering flexible system upgrades.
