TROJAN HYDROLINK WATERING SYSTEM 48V Spare Part

Accessory | TROJAN | HYDRO-HL-U48V-01

Without a simplified maintenance system, prolonged operational uptime for heavy-duty industrial equipment is compromised. The integrated 'Vulsysteem' facilitates straightforward maintenance, directly extending service life and lowering total cost of ownership for demanding applications.

Features

- Delivers consistent 48V power output, ensuring sustained performance for heavy-duty industrial equipment and enabling extended operational cycles.
- Engineered for demanding applications including cleaning machines, aerial work platforms, AGVs, and marine vessels, providing reliable power across diverse environments.
- Features the 'Vulsysteem' for simplified maintenance and enhanced safety, contributing to a lower total cost of ownership and increased operational uptime.
- Built with Trojan's commitment to quality and durability, offering dependable energy storage designed to withstand rigorous daily use and maximize fleet productivity.
