TROJAN HYDROLINK WATERING SYSTEM 48V Consumable

Accessory | TROJAN | HYDRO-HL-U48V-3

Simplify electrolyte maintenance and extend service life in hard-to-reinstall DC systems with our integrated watering system. This 48V traction battery ensures continuous operation for industrial cleaning machines, aerial work platforms, golf cars, marine, and AGVs.

Features

- Delivers sustained 48V power output, ensuring continuous operation for heavy-duty equipment and vehicles throughout their duty cycles.
- Engineered for applications including industrial cleaning machines, aerial work platforms, golf cars, marine, and automated guided vehicles (AGVs).
- Features an integrated fill system for simplified and efficient electrolyte maintenance, reducing operational downtime.
- Designed for deep cycling applications, providing reliable performance through repeated charge and discharge cycles.
