POWERBOOZT 230V Battery Protect

Switch / Schakelaar | POWERBOOZT | IBW.230-25

Caravan and automotive electrical systems require insulation protection that prevents faults and ensures user safety, with a 25 Amp rating delivering secure 230Vac operation. Its compact 100x150x96mm dimensions facilitate easy installation in space-constrained mobile environments.

Features

- Provides secure 230Vac system operation with a 25 Amp rating, preventing electrical faults and ensuring user safety.
- Specifically engineered for reliable insulation protection in demanding environments such as caravans, automotive, marine, and camper applications.
- Compact 100x150x96mm dimensions facilitate easy installation in space-constrained mobile and recreational vehicles.
- Robust construction ensures dependable performance and protection against electrical hazards in mobile environments.
