

POWERBOOZT 16A Battery Protect

Switch / Schakelaar | POWERBOOZT | IBW.230-25C.1P

The integrated 16A automatic circuit breaker with 25A capacity overcomes standard overload vulnerabilities by providing immediate circuit isolation. This switch is specifically engineered for caravan applications, ensuring safe and reliable power management within recreational vehicles.

Features

- The integrated 16A automatic circuit breaker with 25A capacity provides robust overcurrent protection, safeguarding your electrical systems from damage and ensuring operational continuity.
- Specifically engineered for caravan applications, this switch ensures safe and reliable power management within recreational vehicles.
- Features advanced insulation protection, offering a secure barrier against electrical faults and enhancing overall system safety.
- Designed for compatibility with 230Vac combi and grid-connected systems, simplifying integration and ensuring broad applicability.
