

# LEMANIA 12V Conductance Tester

Battery Tester / Accutester | LEMANIA | LEM-T11

Advanced conductance testing precisely diagnoses 12V battery health and starting/charging system issues, enabling accurate system analysis. An integrated printer provides immediate test reports, streamlining customer communication and service documentation for demanding automotive environments.

### Features

- Ensures accurate 12V battery health assessment through advanced conductance testing, enabling precise diagnosis of starting and charging system issues.
- Engineered for the demanding automotive service environment, facilitating rapid and reliable electrical system diagnostics in workshops and on the road.
- Features an integrated printer for immediate generation of test reports, streamlining customer communication and service documentation.
- Provides comprehensive testing capabilities for 12V batteries, starter motors, and alternators, offering a complete diagnostic solution.

WEIGHT

**1,8 kg**

## Technical Specifications

Test Capabilities		Battery Type Support	
Battery Testing	? Yes	Flooded Lead-Acid	? Yes
		AGM	? Yes
		GEL	? Yes
		EFB	? Yes
Voltage Support		Physical Specifications	
12V Support	? Yes	Weight	<b>1,8 kg</b>

### Regulatory Compliance

Standards: EN 61010-1, EN 61326-1  
Regulatory: CE

### Product Identification

Item Code: **LEM-T11**  
EAN/Barcode: **8719325860016**  
Manufacturer Code: **LEM-T11**  
Model: **LEM-T11**
