

STUDER 24V 100A VSR

Switch / Schakelaar | STUDER | MBI100-2IG

Advanced voltage-sensing tech auto-switches 100A charging between 12-24V systems, preventing deep discharge and extending battery life. Ideal for demanding marine, RV, and commercial dual-battery setups, it ensures reliable power management and prevents critical failures.

Features

- Intelligently directs 100A of charging current across 12-24V systems, ensuring all connected batteries receive optimal charge and extending their operational life.
- Engineered for demanding marine, RV, and commercial vehicle dual-battery systems, ensuring reliable power management and preventing critical system failures.
- Features advanced voltage-sensing technology that automatically switches power, safeguarding batteries from deep discharge and maintaining system stability.
- Designed for seamless integration into existing 12-24V electrical systems, providing robust protection against common charging-related issues.

Technical Specifications

Regulatory Compliance

Standards: IEC 60947
Regulatory: CE

Product Identification

Item Code: **MBI100-2IG**
