

## POWERBOOZT 24V 250A Main Switch

Switch / Schakelaar | POWERBOOZT | MBS7

250A continuous current rating ensures safe and complete disconnection of 24V systems, preventing electrical hazards and battery drain during downtime. Its robust design integrates critical safety isolation for maintenance, storage, and emergency situations in recreational vehicles, automotive, and marine applications.

### Features

- Ensures safe and complete disconnection of 24V systems up to 250A, safeguarding against electrical hazards and preventing battery drain during downtime.
- Engineered for reliable operation in recreational vehicles, automotive applications, and marine environments, where robust power management is essential.
- Provides a critical safety feature for electrical systems, allowing for secure isolation during maintenance, storage, or emergency situations.
- Built with durable materials to withstand the demanding conditions of continuous use, ensuring long-term performance and operational integrity.

## Technical Specifications

### Regulatory Compliance

Standards: IEC 60947  
Regulatory: CE

### Product Identification

Item Code: **MBS7**  
EAN/Barcode: **8720618147400**  
Manufacturer Code: **MBS7**  
Model: **MBS7**
