

LEMANIA Marine ON/OFF Switch

Switch / Schakelaar | LEMANIA | PART-LEM0585

Secure and reliable control of critical electrical circuits is achieved through a 2kg robust construction, engineered for the harsh marine environment. This switch ensures dependable power management, extending operational continuity in demanding applications.

Features

- Ensures secure and reliable control of critical electrical circuits in marine applications.
- Engineered specifically for the harsh and demanding conditions found in marine environments.
- Robust 2kg construction signifies durability and long-term performance for essential power management.
- Designed for straightforward integration into vessel electrical systems, offering dependable ON/OFF functionality.

Technical Specifications

Regulatory Compliance

Standards: IEC 60947
Regulatory: CE
