

POWERBOOZT 24V 100A Charging Relay

Switch / Schakelaar | POWERBOOZT | PB-MBR12-24-100

When specifying a charging relay for high-demand automotive systems, 100A continuous current handling ensures rapid battery replenishment and maintains operational continuity. This unit integrates seamlessly with 12-24V systems, providing flexible and reliable power management in diverse operating environments.

Features

- Delivers robust 100A charging current to ensure rapid and efficient battery replenishment, keeping your vehicles operational.
- Engineered for the rigorous demands of automotive applications, providing reliable power management in diverse operating environments.
- Designed to integrate seamlessly with 12-24V systems, offering broad compatibility and operational flexibility.
- Features durable construction and precise switching to protect your battery and electrical system from overcharging and voltage fluctuations.
