

POWERBOOZT 24V 140A Charging Relay

Switch / Schakelaar | POWERBOOZT | PB-MBR12-24-140

140A charging current efficiently manages battery power in 12-24V automotive systems, overcoming the limitations of lower-capacity relays. Engineered for demanding professional vehicle environments, it ensures operational continuity and safeguards against overcharging to extend battery life.

Features

- Delivers 140A charging current to efficiently manage battery power in 12-24V automotive systems.
- Engineered for demanding automotive applications, ensuring reliable performance in professional vehicle environments.
- Facilitates intelligent battery charging control, safeguarding against overcharging and promoting extended battery life.
- Designed for compatibility with PB (Lead-Acid) battery types, ensuring seamless integration within standard automotive electrical architectures.

VOLTAGE RATING

24 V

SWITCH TYPE

MANUAL_DISCONNECT
