Heavy-Duty Terminal Clamp for 16-35mm² Cable

Connector | MATERIAL | PB.22610

Continuous high-load operation in demanding automotive, marine, and RV environments requires a secure electrical connection for critical systems. This terminal clamp's durable construction provides a stable pathway, minimizing resistance and ensuring optimal power transfer for 16-35mm² cables.

Features

- Ensures reliable power transfer for 16-35mm² cables, preventing performance degradation in critical systems.
- Engineered for reliable operation in automotive, marine, and recreational vehicle environments.
- Durable construction provides a secure and stable electrical connection, minimizing resistance and power loss.
- Designed for straightforward installation and maintenance, compatible with starter, charger, and tester systems.
