

Heavy Duty Terminal Clamp 16-35mm²

Connector | MATERIAL | PB.22710

Engineered for 16-35mm² cables, this clamp provides stable, low-resistance connections for reliable power transfer in professional applications. Its robust build ensures superior durability in high-vibration, exposed automotive, marine, and caravan environments.

Features

- Ensures stable, low-resistance electrical connections for reliable power transfer in 16-35mm² cable applications.
- Designed for demanding environments, offering dependable performance in Automotive, Marine, and Caravan/Camper sectors.
- Robust construction provides superior durability and longevity in high-vibration and exposed conditions.
- Facilitates secure, long-lasting battery system connections, minimizing risk of electrical faults.
