

## Negative M8 Terminal Clamp for Battery Systems

Connector | MATERIAL | PB.28042

A low-resistance M8 terminal clamp design minimises voltage drop, ensuring stable power delivery for critical automotive, marine, and caravan systems. This connection withstands high vibration environments to maintain operational continuity in demanding applications.

### Features

- Ensures secure and stable electrical connections for optimal power delivery in critical systems.
- Designed for robust performance in automotive, marine, caravan, and camper environments.
- Provides a low-resistance connection, minimizing voltage drop for efficient power transfer.
- Features standard M8 threading for secure and reliable cable attachment.

## Technical Specifications

### Regulatory Compliance

Regulatory: CE

### Product Identification

Item Code: **PB.28042**  
Manufacturer Code: **B124NM-8**  
Model: **PB.28042**
