

## Negative M10 Terminal Clamp for Battery Systems

Connector | MATERIAL | PB.28062

The M10 terminal clamp ensures a secure M10 connection, preventing power interruption and ensuring consistent electrical conductivity. Engineered for demanding automotive, marine, and RV applications, its robust design sustains long-term durability and operational integrity.

### Features

- Ensures a secure and stable M10 connection for reliable battery power transmission.
- Engineered for demanding automotive, marine, and recreational vehicle applications.
- Robust clamp design for consistent electrical conductivity and long-term durability.
- Provides a critical link for starter and charging systems, ensuring operational readiness.

## Technical Specifications

### Regulatory Compliance

Regulatory: CE

### Product Identification

Item Code: **PB.28062**  
Manufacturer Code: **B124N10**  
Model: **PB.28062**
