

## M10 Terminal Clamp for Battery Systems

Connector | MATERIAL | PB.28352

Commercial vehicle fleets require firm, stable connections for consistent energy flow during starting and charging operations. The M10 post design guarantees a solid connection, critical for maintaining optimal system performance.

### Features

- Ensures secure, high-conductivity electrical connections for optimal power transfer in starter and charging systems.
- Engineered for reliable performance in diverse environments including automotive, marine, and recreational vehicles.
- Robust M10 post design guarantees a firm and stable connection, critical for consistent energy flow.
- Lightweight 0.1kg construction adds minimal bulk while maintaining essential electrical integrity.

## Technical Specifications

### Regulatory Compliance

Regulatory: CE

### Product Identification

Item Code: **PB.28352**  
Manufacturer Code: **B123PM10**  
Model: **PB.28352**
