

## RS315P Red Terminal Cover for Battery Systems

Accessory | MATERIAL | PB.50045

This red terminal cover for RS315P prevents accidental shorts and environmental damage, ensuring safe battery connections in automotive, marine, and caravan applications. Its clear color coding aids in rapid safety protocol identification and quick circuit recognition.

### Features

- Ensures safe battery terminal connections, preventing accidental shorts and environmental damage for enhanced system reliability.
- Specifically engineered for automotive, marine, and caravan/camper applications, offering robust protection in mobile environments.
- Clearly identifiable red color coding aids in safety protocols and quick circuit identification.
- Protects against debris ingress and physical damage, contributing to extended battery life and reduced maintenance needs.
