Terminal Adaptor Set: 5/16" to Standard

Connector | MATERIAL | PB.52772

Low contact resistance ensures a secure, stable electrical connection, preventing power loss and system interruptions in critical applications. This adaptor set facilitates seamless integration between 5/16" post terminals and standard ring or spade connectors for versatile system upgrades.

Features

- Ensures a secure and stable electrical connection, preventing power loss and system interruptions in critical applications.
- Designed for a wide range of demanding environments, including automotive, marine, and caravan settings.
- Facilitates seamless integration between different terminal types, simplifying installation and upgrades.
- Provides a robust and durable connection solution, built to withstand vibration and environmental factors.
