

STUDER XT Panelmount Remote Control

Accessory | STUDER | RCC-03

Real-time system monitoring and programming overcomes limitations of unit-bound control, enabling immediate adjustments and diagnostics without direct access. Its intuitive interface simplifies complex tasks, granting precise control for demanding automotive, caravan, camper, and marine applications.

Features

- Real-time system monitoring and programming for enhanced energy management, enabling immediate adjustments and diagnostics without direct unit access.
- Engineered for versatile use in demanding automotive, caravan, camper, and marine applications, ensuring reliable operation in mobile and off-grid settings.
- Intuitive interface simplifies complex programming tasks, granting users precise control over their power solutions.
- Features a 2-meter cable for flexible installation and robust construction suitable for various environmental conditions.
