

TRACTION-MATERIAL 160A REMA Connector

Connector | TRACTION-MATERIAL | REMA160A-1.5M

160A current capacity delivers efficient power for demanding traction applications, ensuring optimal energy transfer in heavy-duty electric vehicle systems. The integrated 1.5-meter cable simplifies installation and provides reach for 50mm² connections.

Features

- High current capacity (160A) ensures efficient power delivery for demanding traction applications.
- Specifically designed for industrial environments and heavy-duty electric vehicle systems.
- Integrated 1.5-meter cable simplifies installation and ensures proper reach for 50mm² connections.
- Robust construction ensures reliable connectivity and longevity in rigorous operational settings.
