

TRACTION-MATERIAL REMA 320A Cable Connector

Connector | TRACTION-MATERIAL | REMA320A-1.5M

Without secure high-load power transmission, demanding equipment risks operational failure — the 70mm² cable capacity connector delivers uninterrupted service continuity. Its integrated 1.5m cable simplifies installation and assembly time, enhancing operational efficiency in mobile and high-vibration environments.

Features

- Securely transmits high electrical loads with its 70mm² cable capacity, ensuring operational continuity for demanding equipment.
- Engineered for electric vehicles and industrial machinery, providing reliable power connections in mobile and high-vibration environments.
- Features an integrated 1.5-meter cable for simplified installation and reduced assembly time, enhancing operational efficiency.
- Built to withstand harsh conditions, offering dependable performance and a secure connection in dusty or damp industrial settings.
