

TRACTION-MATERIAL REMA 80A Connector

Connector | TRACTION-MATERIAL | REMA80A-1.2M

The 1.2-meter lead for 25mm² cables prevents connector overheating under high current loads. This REMA 80A rated connector integrates seamlessly for reliable power transfer in demanding industrial applications.

Features

- Securely connects 25mm² cables with a 1.2-meter lead for flexible installation.
- Engineered for high-current applications in industrial and mobile power systems.
- Built for durability and consistent performance in demanding operational environments.
- Ensures reliable current transfer, minimizing downtime in critical power applications.
