TRACTION-MATERIAL REMA 80A Connector

Connector | TRACTION-MATERIAL | REMA80A-1.2M-BT

High current demands for continuous heavy-duty operation are managed by a secure, low-impedance connection. This REMA 80A connector features a pre-attached 1.2-meter cable for 25mm² conductors, simplifying installation and ensuring efficient power delivery.

Features

- Safely manages high current demands for continuous operation of heavy-duty battery-powered equipment.
- Specifically engineered for electric forklifts, AGVs, and industrial vehicles requiring reliable power transfer.
- Features a pre-attached 1.2-meter cable for 25mm² conductors, simplifying installation and ensuring efficient power delivery.
- Designed for robust electrical connections in demanding industrial environments, ensuring equipment uptime.
