

## 175A Anderson Connector

Connector | MATERIAL | SB175-G

Handles 175A continuous current for uninterrupted critical system operation. Engineered for demanding mobile/stationary applications, it ensures secure, high-integrity connections for efficient power transfer and long-term reliability in high-amperage circuits.

### Features

- Handles substantial power loads with a 175A continuous current rating, ensuring uninterrupted operation of critical electrical systems.
- Engineered for demanding mobile and stationary applications including automotive, marine, caravan, and camper power distribution.
- Features a secure, high-integrity connection designed for efficient power transfer and long-term reliability in high-amperage circuits.
- Designed for compatibility with 50mm<sup>2</sup> cable, facilitating robust and safe connections for substantial power requirements.

## Technical Specifications

### Regulatory Compliance

Regulatory: CE

### Product Identification

Item Code: **SB175-G**  
Manufacturer Code: **SB175**  
Model: **SB175-G**
