

50A Anderson Connector

Connector | MATERIAL | SB50-Y

Secure 50A connections prevent energy loss and ensure reliable operation for critical loads. This Anderson connector provides efficient, safe, and repeatable high-current power transfer for automotive, marine, and RV systems.

Features

- Delivers a secure 50A connection, ensuring efficient power transfer and preventing energy loss for critical loads.
- Engineered for automotive, marine, and RV applications where reliable power is essential for vehicle systems.
- Features a high-current Anderson interface for quick, safe, and repeatable connections and disconnections.
- The bright yellow color coding provides clear circuit identification, improving safety and reducing installation errors.
