

MATERIAL 25mm² Connector Set

Connector | MATERIAL | SL.CNNT.25.B

In demanding automotive, industrial, and renewable energy systems, a 25mm² cross-section ensures secure high-current connections, enabling efficient and reliable power transmission. This durable connector set integrates seamlessly into power distribution architectures, providing longevity and consistent performance.

Features

- Securely connects 25mm² cables for high-current applications, ensuring efficient and reliable power transmission.
- Designed for automotive, industrial, and renewable energy sectors, providing versatile power distribution solutions.
- Durable construction ensures longevity and consistent performance in demanding operational environments.
- Features a 1.5-meter length and black color coding for flexible and organized electrical installations.
