

SUNLIGHT POWERESS STACK KIT

Accessory | SUNLIGHT | SL.ESS.STACK

This modular stacking kit securely integrates SUNLIGHT batteries for scalable energy storage in fixed/mobile DC systems where re-installation is difficult. It ensures robust, reliable interconnections for system stability and optimal performance in critical infrastructure and off-grid renewables.

Features

- Enables secure and efficient stacking of SUNLIGHT battery modules for scalable energy storage solutions.
- Designed for integration into critical infrastructure backup power and off-grid renewable energy systems.
- Facilitates robust and reliable interconnection, ensuring system stability and optimal performance.
- Constructed for durability to withstand demanding operational environments, ensuring long-term system integrity.
