

TRIMAXX 5040Wh Powerstation Battery

Battery / Accu | TRIMAXX | TMX.PPS.5.0X

Doubling the energy reserve to 5040Wh allows critical equipment to operate longer, sustaining essential functions during extended outages or remote deployments. Advanced battery technology ensures consistent, reliable energy delivery, providing vital operational continuity.

Features

- Doubles your portable power station's energy reserve, enabling longer operation of critical equipment and devices.
- Engineered for demanding outdoor, remote, and emergency backup scenarios where continuous power is essential.
- Leverages advanced battery technology for consistent, reliable energy delivery, ensuring operational uptime.
- Designed for seamless integration with compatible TRIMAXX power stations, offering a straightforward expansion.

NOMINAL VOLTAGE

48 V
