

# STUDER XCOM-CAN Communication Interface

Accessory | STUDER | XCOM-CAN

Translate STUDER system data to standardized CAN messages for automotive, caravan, camper, and marine use. This interface enables advanced energy management monitoring and control with external systems.

### Features

- Enables seamless data exchange between STUDER energy systems and CAN bus networks for advanced monitoring and control.
- Specifically engineered for integration within automotive, caravan, camper, and marine applications requiring reliable communication.
- Translates critical performance and diagnostic data into standardized CAN messages for easy integration with external monitoring and management systems.
- Ensures deterministic data flow for critical parameters, allowing for informed decision-making and operational adjustments in real-time.

WEIGHT

**0,4 kg**

## Technical Specifications

### Physical Specifications

Weight

**0,4 kg**

### Regulatory Compliance

Regulatory: CE

### Product Identification

Item Code: **XCOM-CAN**  
Manufacturer Code: **XCOM-CAN**  
Model: **XCOM-CAN**
